

**INTERNET  
SO FAST  
IT'S PROBABLY  
ILLEGAL**

**SPACELINK**

Gigabit Fiber. Shockingly fast.

# YOUR INTERNET IS TOO SLOW. WE CAN FIX THAT.

Your current provider would *love* for you to go on thinking that something like 20 megabits per second download (and a paltry 3 megabits per second upload) is “fast Internet.”

Well, here’s what fast Internet really looks like.

**Spacelink Gigabit Fiber** can give you up to **1000 megabits per second**, download *and* upload. How fast is that? Fast enough to **download an entire movie (14 GB) in under two minutes**. And, we’d like to bring such shockingly fast Internet speeds to your residential complex, **for under a hundred bucks a month**. Sound good? Let us know. If we get enough “**heck yeahs!**” from you and your neighbors, we’ll bring it to you!

*Fine print: Don’t worry. These speeds are **completely legal**.*

8830 Complex Dr  
San Diego, CA 92123
